

Juliet Fang

My work explores the fast lifestyle and how new things happen around me. Modern life interests me to discover more myself and re-arrange the relationship between inner and outer worlds and how the human being lives in a changeable situation. How do we feel? I am curious about these questions, especially the negative part which like a button could activate my mind, making me feel more about the existence of self.

Many images have been created every minute which include various messages, I pick up these images in a neutral way and am affected by sad emotion. I hear these messages from around the world, making me understand each human being better; what we really want is to be cared for.

I use a variety of materials such as discarded, not permanent, objects.

b.1982 Born in Taiwan
 Lives and works in London and Taipei.

Education

2007-2011 Camberwell College of Arts, BA Hons, Fine Art Painting

Solo Exhibition

2015 81Books Gallery, Tokyo
