

Juliet Fang

My work explores the fast lifestyle and how new things happen around me. Modern life interests me to discover more myself and re-arrange the relationship between inner and outer worlds and how the human being lives in a changeable situation.

The desire of expressing the idea in a diverse way such as photography, writing, use different materials into visualization, to keep something connection with me. I don't know that reason why I am interested, is more curious for me to explore deeper.

To draw a position for each idea with consideration, I will decide how much it reveal or obscure for understanding, how to express and material used, there is no permanent form, I prefer it development freely.

b.1982      Born in Taiwan  
                 Lives and works in London and Taipei.
